

DISPLAY FIREWORK WATERFALL SETPIECE

This setpiece depicts a waterfall of silver sparks suspended between two posts

INSTRUCTIONS

Remove waterfall from package and tie to a rope or wire at regular intervals.

Get two posts 3\" x 2\" x 10 feet high.

Tie the rope or wire between the top of these posts.

Erect the posts approx. 30 feet apart until the rope/wire is taut.

Tape the long fuse to one of the posts to secure it.

Make sure you can reach fuse to light it. If not tie the portfire to a length of cane to extend the reach.

Light tip of green fuse with portfire at arms length and retire immediately.

WARNINGS

SPECTATORS MUST BE AT LEAST 25 METRES AWAY.

EMITS SHOWERS OF SPARKS.

FIREWORKS INTERNATIONAL, DERBY, DE65 6EJ

Complies with BS7114 Part 2 1988

TIPS

It helps if stakes are driven into the ground first, and the 10 foot posts are tied to these. This will make it easier to fix the waterfall to the rope or wire you use between the posts. The whole post and waterfall assembly can then be raised and tied to the stakes.
